

Voluntary Report – Voluntary - Public Distribution

Date: April 21, 2021

Report Number: UP2021-0020

Report Name: Sunflower Export Cap

Country: Ukraine

Post: Kyiv

Report Category: Oilseeds and Products, Agricultural Situation

Prepared By: Denys Sobolev

Approved By: Robin Gray

Report Highlights:

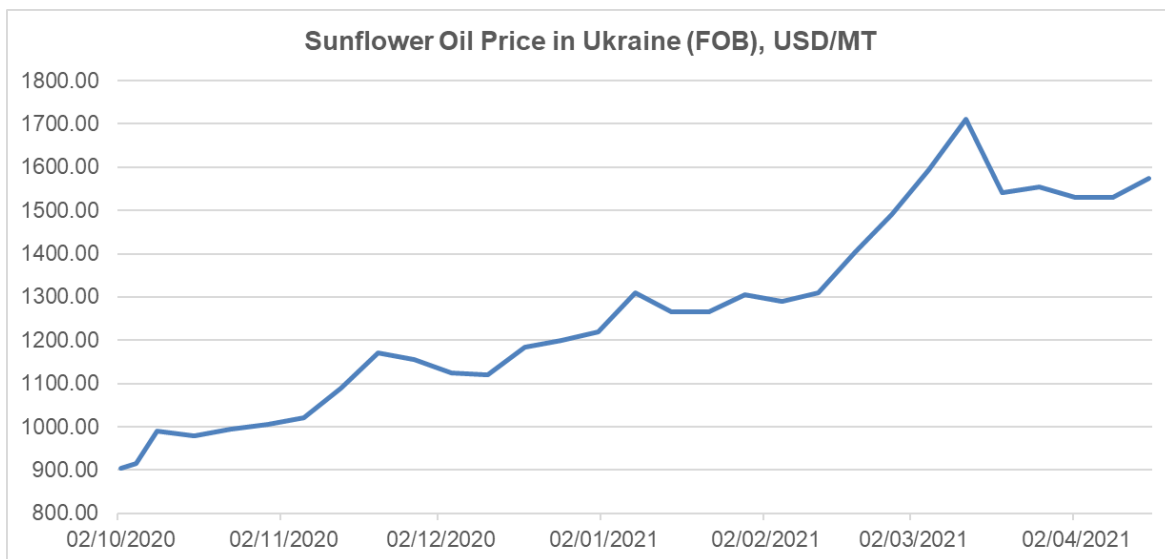

Ukraine sets an export cap for sunflower oil at 5,380 thousand metric tons (TMT)

In accordance to the news release ([in Ukrainian](#)) by the Ministry of Economic Development, Trade and Agriculture (MEDTA), Ukraine sets an export cap for sunflower oil (HS Code 1215) at 5,380 TMT for local marketing year (MY) 2020/21 (September 2020-August 2021).

This was done in a format of a non-binding Memorandum of Understanding (MOU) between MEDTA and Ukroliyaprom, which is the industry association that represents interests of major oil crushers and processors in Ukraine. This is similar to the MOUs that were employed to put caps on grain exports, for more details see our [GAIN Report UP2021-0006](#).

According to MOU's copy available to Post, export caps are set before September 1, 2021, which potentially opens a way for oil exporters to continue unobstructed exports of their stocks in September before the standardized MY2020/21 (October 2020- September 2021) is concluded.

The main rationale behind export limitations are the MEDTA's intentions to take control over growing domestic sunflower oil prices. Ukraine exports over 90 percent of sunflower oil produced, thus FOB export prices (see graph Sunflower oil price below) in Ukrainian ports are closely followed by the domestic oil prices.
