

Oilseeds: World Markets and Trade

Canada Canola Crush Raised to New Record

The 2025/26 Canada canola marketing year concluded at the end of July with Canadian government data confirming new highs for the crushing sector. Crushing data from Statistics Canada came in at a new monthly record of nearly 1.2 million tons for June. Strong performance is also expected in July with the completed expansion of the Yorkton, Saskatchewan crushing facility, which doubled its capacity. Canada canola crush estimates for 2025/26 were raised 300,000 tons to 12.7 million tons to account for the recent strong crush performance.

For 2026/27, the Canada canola crush forecast is raised 500,000 tons to 13.7 million tons, attributed to strong demand, higher supply, and gains in canola crush capacity. As a result of many upgrades, expansions, and completion of new facilities over the past 3 years, crushing facilities in Canada have outperformed previous expectations. Motivating the increase in production is robust margins for canola crush. October contracts for canola crush on the Intercontinental Exchange are near \$200/ton, a sharp (70 percent) increase compared to a year ago.

Strong domestic and international demand for canola oil is driving this strong crush. Domestically, Canada is using an increasing amount of canola oil for biomass-based diesel (BBD) production. BBD consumption is rising domestically with substantial amounts also exported to the United States and the European Union. Additionally, record volumes of canola oil exports are forecast for 2025/26 and 2026/27. This oil is primarily exported to the United States and used for food manufacturing and BBD production.

The record crush is also producing record amounts of canola meal. The majority of this meal is exported, primarily to the United States. Exports of canola meal are estimated at 6.1 million tons in 2025/26 and 6.4 million in 2026/27, both records if realized. Feed consumption of canola meal in Canada has also grown rapidly. Canola meal can be used in most animal feed rations, with particular advantages for use in dairy and finfish feed.

OVERVIEW 2026/27

Global oilseed production is raised this month with increased Canada rapeseed and soybean production from the United States, despite lower production for Ukraine soybeans and European Union sunflowerseed. Oilseed trade is increased slightly with higher sunflowerseed exports from Moldova and soybean exports from Argentina more than offsetting lower soybean exports from Ukraine. Global crush is raised on increased U.S. soybean and Canada rapeseed, countering decreased crush for Ukraine soybeans. Global oilseed carryout is unchanged. Global protein meal trade is raised with higher U.S. soybean meal exports. Global vegetable oil trade is lowered on decreased Indonesia palm oil exports due to higher domestic consumption. Global vegetable oil carryout is lowered on decreased Indonesia palm oil stocks.

The projected U.S. season-average farm price for soybeans is unchanged at \$11.40 per bushel.

OVERVIEW 2025/26

Global oilseed production is lowered slightly this month on a reduction for Ukraine sunflowerseed and Argentina soybean production offsetting increased production for Brazil soybeans. Global oilseed trade is raised with increased Argentina sunflowerseed and Canada rapeseed exports offsetting decreased Ukraine rapeseed exports. Global oilseed crush is increased on Brazil and Egypt soybeans, and Canada rapeseed, despite decreased crush for Ukraine sunflowerseed. Global oilseed carryout is lowered on smaller stocks of Canada rapeseed and Paraguay soybeans.

Global oilseed meal trade is raised on Brazil and Turkey soybean meal and China rapeseed meal exports. Global vegetable oil trade is raised slightly on Colombia palm oil and Brazil soybean oil countering decreased Canada rapeseed oil and Ukraine sunflowerseed oil. Global vegetable oil carryout is raised on higher India soybean oil, countering decreased Indonesia palm oil.

The projected U.S. season-average farm price for soybeans is unchanged at \$10.40 per bushel.

EXPORT PRICES

U.S. soybean export prices climbed during the first half of July, briefly exceeding \$500/ton for the first time since early 2024, driven by large China soybean purchases and dryness across many U.S. growing regions. U.S. soybean prices declined in late July and early August on expectations of rain in dry areas, partially reversing earlier price gains. Brazil and Argentina soybean export prices moved largely in tandem with U.S. prices, as did soybean meal export prices for all three major exporters.

U.S. soybean oil prices followed soybean prices upward, not quite reaching early June highs, before declining in late July due to soybean price pressure and falling petroleum prices. Export prices of Argentina and Brazil soy oil, still priced well below U.S. soybean oil, also tracked with soybeans. Indonesia and Malaysia palm oil export prices were largely flat, with some fluctuations due to shifting petroleum prices through the month.

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

ENDNOTES

REGION DEFINITIONS

North America: Canada, Mexico, the United States

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama

Caribbean: Cuba, Dominican Republic, Haiti, Jamaica, Trinidad and Tobago

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela

EU: Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, and Sweden. Effective January 1, 2021, the separation of the United Kingdom (UK) from the European Union (EU) was complete, including trade between both entities. Starting in May 2021 with the release of 2021/22 data, grain PSDs reflect EU27 (shown in the PSD system as “European Union”) and UK separately. Beginning with the release of 2021/22 data, historical data for both EU27 and the UK are provided for 5 years (2016/17 through 2020/21).

Other Europe: Albania, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, North Macedonia, Montenegro, Norway, Serbia, Switzerland, United Kingdom

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan

Middle East: Afghanistan, Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia

Sub-Saharan Africa: all African countries except North Africa

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan

South Asia: Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam

Oceania: Australia, Fiji, New Zealand, Papua New Guinea

OTHER NOTES

Marketing Years (MY): MY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's MY for that commodity (2022/23 starts in 2022); except for oilseeds in certain Southern Hemisphere countries, where the second year begins the MY (2022/23 starts in 2023). For a complete list of local marketing years, please see the FAS website (<https://apps.fas.usda.gov/psdonline/>): go to Reports, Reference Data, and then Data Availability.

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years.

Oilseeds HS Codes
